***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Nam (U.

S. Patent 6,141,598).

Regarding claims 1-10, Nam discloses a method for a production plan (200 to 211 to 210) including transmitting a production plan through the network, storing the plan, reading the plan and material requirements (figures 3 and 4A/4B, column 8, lines 34<sup>+</sup>).

Regarding claims 12-16, Nam clearly discloses the claimed system for immediately issuing a production plan (Abstract and figure 3).

***Response to Arguments***

2. Applicant's arguments filed June 14, 2004 have been fully considered but they are not persuasive.

Regarding applicant's argument that "Nam" fails to disclose "a network for the control system 200 to the slave systems 210-230". The examiner directs the applicant's

attention to figure 3 of "Nam", which clearly shows the network or connection (exchange specification data). The term "network" is very broad and per Webster Internet site (<http://www.webster.com/cgi-bin/dictionary?book=Dictionary&va=network>), the network can be 1 : a system of lines or channels resembling a network  
**2 a** : an interconnected or interrelated chain, group, or system <a *network* of hotels> **b** : a system of computers, terminals, and databases connected by communications lines, and therefore "Nam" meets the requirement of "network".

Figure 3, clearly shows (upper left), the production plan, and computer for operational status data, which are stored in main and back-up form (inherent properties of computer and related system).

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
